WEDDING WEBSITES

Having a well designed wedding website is a great way to push out useful information to your guests. From accessing your registry to getting directions to your venue, your wedding website will be a one stop destination for all the details your guests need.

WHAT TO EXPECT ON YOUR WEBSITE

HOME PAGE

Whether you have a site that is a one page scroll or a traditional site layout your home page will provide navigation that allows guest to easily find anything they need on your site. The home page can also include an introduction to your wedding website.

TRAVEL AND LODGING

Directions and venue information as well as accommodation suggestions for out of town guests.

REGISTRY INFO

Up to date registry information and links to registries.

UPDATES

Keep your guests informed on any events or changes with live updates.

PHOTO GALLERY

Share engagement and wedding photos on your site.

ADDITIONAL FEATURES

Custom Domain - Wedding Invitations - Virtual Guestbook - Custom Design
Mobile Responsive - Facebook Integration - Online RSVPs - Wedding Party

Wedding websites include, but are not limited to, these features. If you would like additional aspects of your wedding implemented into your website custom plans are available.
